Len Foote Hike Inn

Amicalola Falls State Park, Georgia

The Epsten Group provided LEED consulting to the Department of Natural Resources of Georgia for this LEED-EB Gold certification, the first LEED-EB certification in Georgia. The hike inn is located in a remote area of the North Georgia Mountains, with guests arriving on foot, and features partial power generation through a photovoltaic system. In addition to guiding the LEED-EB objectives, The Epsten Group assessed the building in detail for the energy and indoor environmental quality prerequisites and credits in LEED-EB.
